

**ISSUE:** Deforestation

“Our plan is to have **outposts all over Brazil to house animals that are affected by deforestation**, we will also have **tree nurseries** in the outposts. We will eventually gain enough land to keep forests from getting deforested.”

“Our facility consists of 2 greenhouses for growing the trees until they are big enough to plant in the courtyard. when the trees are about a year old we will uproot them and plant them in the wild to fill in areas that have been deforested.”
